PROFILE

I am a highly motivated and passionate individual with a strong desire to pursue a career as a Software Engineer. With a recent BSc degree from the University of Kelaniya and successful completion of the full-stack developer programme offered by the University of Moratuwa, I possess a solid foundation in software development and a deep understanding of web technologies.

MY PROJECTS

E-Commerce Website

Develop a responsive website with CRUD functions, including signup, login, updating account details, browsing items, managing shopping cart, viewing order history, accessing order details, and more.
MERN | click

GPA Calculator Web App

Managing subjects with CRUD operations and automatically calculating GPA.
MERN | Bootstrap | click

Shopping List Management Web App

Responsive CRUD web application for shopping list management.
MERN | Bootstrap | click

Backend User Management APIs

CRUD APIs for managing user records, including operations to create a new user, read user details by ID, update user details, and delete a user. Additionally, include unit test code.
Node.js | ExpressJs | MongoDB | API | Postman | click

Travel Lanka Website

Responsive website for a travel company, featuring information browsing and online reservation capabilities.
HTML | CSS | JavaScript | PHP | MySQL | Bootstrap | click

King Taste Restaurent Website

Restaurant website for information browsing and viewing available food options for reservations, featuring a responsive design.
HTML | CSS | click
